FieldMosaic
by CloudFM Solutions

Inspections, evidence and reports in one place.

Every detail. One complete picture.

FieldMosaic Preview · Product overview · 2026

The complete inspection record

Keep customers, sites, jobs, visits, areas and observations connected. Link each photograph to the finding it documents.

From evidence to a report

Capture in a mobile browser, review checklists and history, then generate an editable Word document from the selected visits.

Storage chosen by the organisation

Use a dedicated Google Drive, OneDrive or SharePoint connection. Administrators choose and verify the destination.

External evidence, with review

Evidence Requests give a recipient a secure link. The team reviews submissions before accepting them into the inspection record.

A controlled Preview

Protected access, fictional demonstration data and no purchases. Request access for evaluation; commercial terms require separate confirmation.
